JULY 1, 1964

Air Defense Unit Joins Army Missile Command

PREPARE FOR UGF CAMPAIGN—David Hayles (right) goes over the details of the work that the Admissions and Budget Committee will perform prior to the start of the Huntsville-Madison County UGF drive this fall. A veteran of two years service with the committee, Hayles was named chairman this year. He selected Lowers and Mrs. Edith Gibbs to serve with him. They are busily performing a review of the proposed budgets submitted by each of the 33 member agencies and will present an overall budget to the UGF Board of Directors for approval.

Missile Command Budgeters Help UGF

It is still a few months before the start of the 1964 United Givers' Fund campaign on the Arsenal but a trio of Missile Command employees have already put in a considerable number of hours in preparing a budget for the community-wide fund raising effort.

They are David Hayles, Horace Lowers and Edith Gibbs, volunteer members of the Admissions and Budget Committee for the Huntsville-Madison County UGF.

The three, along with thirteen fellow members of the Committee are completing a review of the

EDITH GIBBS

budgets proposed by the 33 local and national agencies for inclusion in this year's appeal.

When their review is completed the budgets will be presented to the UGF Board of Directors and, upon approval, will comprise the amount which becomes the UGF fund drive goal.

The committee, headed by Hayles, represents a broad section of the community. Six members represent Civil Service, the Army and NASA, two are from local business, and the remaining eight represent large industry in the community.

Collectively they have contributed more than 400 hours to the community in their review of the agency budgets. It is anticipated that close to 100 additional hours

(See BUDGETERS on Page 3)

PRESIDENT APPOINTS CHIEF OF STAFF

Washington (AFPS)—President Lyndon B. Johnson has named Lt. Gen. Harold K. Johnson as Chief of Staff, U. S. Army, to succeed Gen. Earle G. Wheeler who has been appointed as Chairman of the Joint Chiefs of Staff.

As the Army's Vice Chief of Staff, the President appointed Lt. Gen. Creighton W. Abrams to succeed Gen. Barksdale Hamlett, who announced his retirement after a recent heart attack.

Prior to his selection for the Chief of Staff post, General Johnson served as Deputy Chief of Staff for Operations. General Abrams has been serving as commander of the Army's V Corps in Germany.

A new unit with a mission stretching to wherever men use missiles to defend their skies begins operating today with the Army Missile Command.

It is officially known as the Air Defense Fire Coordinating/Distribution Systems Office.

The new unit will begin functioning with a brief ceremony at 10 a.m. today at their headquarters, Building 7156.

Heading the list of dignitaries to be on hand for the occasion is

Maj. Gen. John G. Zierdt, Commanding General of the Army Missile Command.

Under Gen. Persons

The new organization will function under the direction of Brig. Gen. H. P. Persons, Jr., Deputy Commanding General for Air Defense Systems.

The unit develops equipment which surveys the air space and assigns air defense missile units to areas of responsibility, as well as controlling firepower for the units.

Events scheduled at this morning's opening ceremony include a reading of the General Order which officially sets the organization into motion, and a rundown of the unit's mission and programs.

The new unit, with a staff of highly-qualified scientists and engineers, formerly was the U. S. Army Air Defense Engineering Agency at Fort Meade, Md.

Outstanding Record

It comes to the Missile Command with an outstanding record of success. Formerly, it developed such key items as the "Missile Master," and the "Missile Monitor," both of which coordinate firepower between operational batteries of Army air defense missile systems.

The Missile Master, designed for use in defending the skies above the U.S., is now widely in use protecting major cities and defense installations. The Missile Monitor does the same job for Army air defense systems operating overseas.

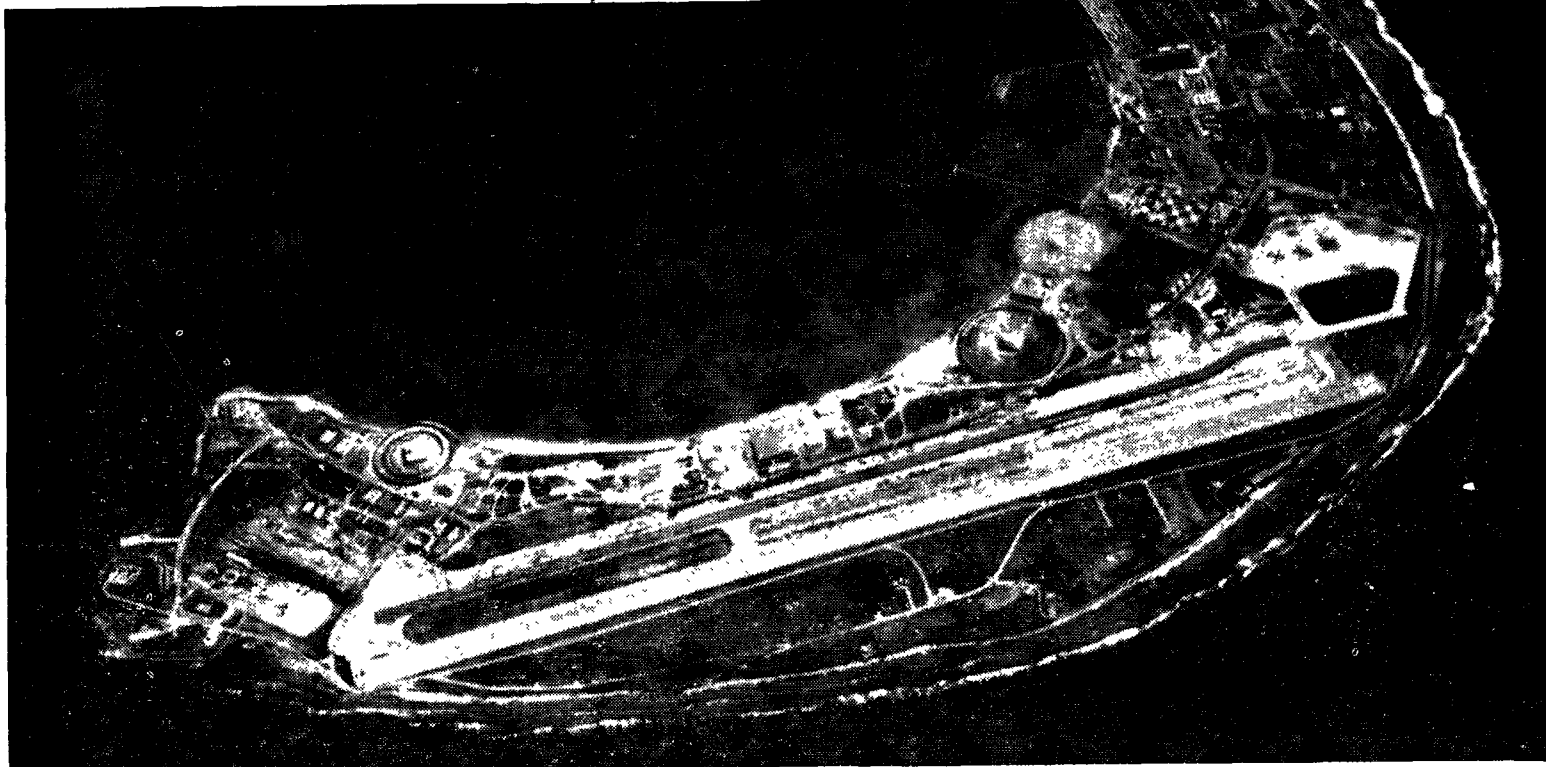

Heading the new element at the Missile Command on a temporary basis is Col. R. M. Colquitt, newly named Nike Hercules Project Manager. He formerly was a staff officer at Fort Meade, Md.

Many Transfer

Directing the working affairs of the office is James W. Gould. Many of the personnel who work in the

(See AIR DEFENSE on Page 3)

NIKE-X NEST—This is Kwajalein Island in the far off Pacific, major test site for the Nike-X antimissile system and newest member of the Redstone Arsenal community. It's so far away, that it's already tomorrow there, and today, July 1, which is already yesterday there, was the day the Nike-X Project Office took over management of the island from the Navy. Col. I. O. Drewry, Nike-X Project Manager, was there, and so was the ROCKET. We'll have complete details and pictures for you next week on the transfer and the people—many from Redstone—who make the place go.

The Redstone Rocket

The Redstone Rocket is published weekly, on Wednesdays. The publisher will receive editorial content for publication in the Rocket only through the Information Office, Army Missile Command, Redstone Arsenal, Ala., Bldg. 5250, Room A-136, Extension 876-4161.

All advertising copy and payments therefor are received by Mrs. Zillah T. Heath, Huntsville, Ala., P. O. Box 346, telephone 534-4701, as representative of the publisher. Advertising deadline—both display and wantads—is noon of Friday before publication.

The Redstone Rocket is distributed free of cost to personnel at Redstone Arsenal. Mailing rates of post for the Rocket are \$6.36 a year, or \$3.50 for six months, tax included. Mailing arrangements may be made with the publisher, P. O. Box 520, Huntsville, Ala.

Rocket Ruminations

The TRUTH doesn't HURT unless it OUGHT to.

It's A Grand Day

July Fourth is American as Thanksgiving—a family day.

Usually July Fourth is a bright day inviting picnics and lazing on the grass, cooling off in the swimming pool, bright clothes to vie with summer flowers.

Many families begin the day with a private flag ceremony, unfurling the flag and placing it on its staff outside the front door, because this is the brightest symbol of all on July Fourth—United States Independence Day.

City folks are usually treated to elaborate fireworks displays in the early evening. The displays are carefully controlled to prevent the tragedies that outlawed fireworks handled by young and old in the past. There are still isolated tragedies caused by fireworks, but the number diminished with teeth in the laws.

Now, the more usual tragedies are overtired, overtaxed and overwrought drivers who participated too fully in the family games and wore themselves out before getting behind the wheel of a car. Or the careless boat handlers, skiers and swimmers who don't observe rules of water safety, or just basic outdoor hazards of poison ivy, oak and other flora that entrap the unwary.

Being safe and happy is easier. Common sense and the will to survive that won this great land for us are the ingredients to mix for a happy holiday.

July Fourth—Independence Day. It's a bright day, and it is yours to keep bright.

LANCE OFFICIALS MEET—Four of the key officials attending a meeting last week on the Army's new Lance missile system are shown as sessions got underway at the Missile Command. They are, left to right, James J. Ling, President and Chairman of the Board at Ling-Temco-Vought, prime contractor for the Lance system; Col. Walter E. Mehlinger, Lance Project Manager; Gen. Frank S. Besson, Commanding General of the Army Materiel Command; and William Darling, vice president of North American Aviation Corp., a major sub-contractor on the Lance.

MPs Celebrate 21st Birthday

The 21st birthday of the 291st Military Police Company was observed with a cake cutting ceremony in the Company Day Room Thursday afternoon for members of the unit and special guests.

The 291st was first organized on June 25, 1943 at Fort Custer, Mich. and saw active duty in the campaigns for Northern France and the Rhineland in 1944 and 1945. Inactivated at Camp Claiborne, La., in August, 1945, the Company was reactivated in July, 1955, and assigned to Redstone Arsenal.

Special guests at the ceremony included Col. Robert M. Allgeier,

Assistant for Operations and Security, W. F. Dyar, Chief of the Huntsville Police Department, C. W. Foster, President of the Madison County Mental Health Association, and members of the Huntsville Police Department.

Foster presented certificates to Capt. Elvin J. Kidd, Commanding Officer of the 291st, signifying completion of a course by approximately 160 members of the unit on "How to Recognize and Help Abnormal People." The course was held in May at the Public Utilities Building under the sponsorship of the Madison County

Mental Health Association and was attended by both military and civilian police.

4294 UNIVERSITY DRIVE

PROCUREMENT CHIEF VISITS—Col. John Prendergast (right), chief of the Cleveland Procurement District, is briefed on the Army Missile Command's Plasma Jet Facility by Dr. Thomas A. Barr of the Directorate of Research and Development. The high-speed gases which flow through the facility in operation are superheated to duplicate both speed and heat encountered by a missile nose cone on re-entry. Burr is chief of the Plasma Physics Branch in the Directorate's Physical Science Laboratory at Redstone Arsenal.

BUDGETERS
(Continued From Page 1)

will be required before the overall budget is ready for submission to the UGF Board of Directors in mid-July.

When this important phase of the drive is completed the Admissions and Budget committee will turn their interest to a review of other agency problems which are associated with the conduct of the annual crusade.

Chief of the Management Systems Division in the Office of Management Science and Data Systems, Hayles is serving on the Admissions and Budget Committee for the third consecutive year. He was named Chairman of the Committee this year after having been

vice-chairman last year. A native of south Alabama, he came to Redstone in 1952 after having been employed at Brookley Air Force Base.

A veteran in the administration of UGF campaigns, both in the city of Huntsville and on the Arsenal, Mr. Lowers is a member of the Committee for the first time. The Chief Engineer for the Missile Command was a member of the UGF Board of Directors last year and the year before served as campaign chairman on the Arsenal.

Mrs. Gibbs is serving her second year on the committee. The Chief of the Data Processing Office for the Supply and Maintenance Directorate has been working at Redstone since 1956, coming to Alabama from Lordstown Ordnance Depot in Ohio.

AIR DEFENSE
(Continued From Page 1)

new element have transferred with their jobs from Fort Meade to the Missile Command.

The transfer of functions was announced by the Army on Jan. 31. A total of more than 20 civilian personnel chose to come with their jobs to the Missile Command. All employees are scheduled to be at their desks during the month of July. Officials pointed out that a limited amount of recruiting will be carried out for highly qualified

civilian scientists and engineers to work in specialized areas of the new office.

In addition to civilian personnel coming with the new element, a total of some 50 enlisted military men and four officers have transferred to the Missile Command.

Work Specialized

Their highly specialized work involves detailed development and procurement knowledge in the fire coordination and distribution field. This includes radar, computers and display equipment integral to the Army Missile fire coordination and distribution systems. Gould points out that the ma-

jority of the enlisted men who are transferring to the Missile Command with the new operating element are officially classified as scientists and engineers.

The enlisted men are assigned to Headquarters and Headquarters Detachment, Army Missile Command, under the command of Capt. Kenneth Kittelberger.

The Army Materiel Command, of which the Missile Command is a major element, said the transfer was made to bring greater efficiency and economy of operation as well as to provide substantial savings in overhead and administrative work.

UNIVERSITY
(Continued From Page 1)

our recruiting program. It will be an added incentive for highly skilled persons we must attract from other areas. It will also be of real assistance in helping us retain our personnel.

"Although the University's graduate study program has been of great help to us in the past in providing advanced training for members of our Army missile team, many of us have wanted an undergraduate program for our personnel, both military and civilian, and their families, such as the University now proposes.

"You and your committee have our enthusiastic support in this program," General Zierdt concluded in the letter to Spragins.

Col. Macpherson saw the undergraduate program benefiting officers, enlisted men, students and children of military personnel assigned to the Army Ordnance Guided Missile School as well as the school's staff and faculty.

"With the Army encouraging all its officers to acquire at least a Bachelor's degree in some field, the new Huntsville campus program will attract a higher percentage of our faculty and staff," he said.

Col. Macpherson saw the expanded program appealing to many of the 5,000 missile students whose college training is often interrupted by their military duty.

He also said it would offer new career improvement chances for older, non-commissioned officers who have not been stationed near a degree-granting institution.

The University has already allocated \$500,000 for a new building and the first class of some 125 freshmen will begin classes in Huntsville in September.

Third Army Honors New Deputy CG At McPherson

HEADQUARTERS, THIRD U. S. ARMY, Fort McPherson, Ga.—Maj. Gen. William C. Bullock, newly assigned deputy Third U. S. Army commander and commanding general, Ft. McPherson, was scheduled to receive traditional military honors when he arrived yesterday.

An honor guard ceremony was scheduled on Hedekin Field at 8:30 a.m. with the Third Army's Honor Guard and Band participating.

Gen. Bullock's last assignment was with the North Atlantic Treaty Organization (NATO) at Fontainebleau, France, where he was commanding general of the U. S. Army Element and deputy chief of staff for Logistics and Organization, Allied Forces Central Europe.

He succeeds Maj. Gen. Daniel A. O'Connor, who retired May 31.

When traveling throughout the seven Southeastern states of the Third Army area, the general will be in "home territory." Gen. Bullock, a graduate of the U. S. Military Academy, was born in Nashville, Tenn. He completed high school in Jacksonville, Fla., where his parents, Mr. and Mrs. Emmett H. Bullock of 3160 Belden Cr., now reside.

From November 1959 until October 1962, Gen. Bullock served as commanding general of the newly-formed XIX U. S. Army Corps and held the additional position of post commander at Fort Chaffee, Ark. for the latter part of that time. He commanded the U. S. Army Training Center, Field Artillery, at Fort Chaffee for a year before assuming command of the corps.

Gen. Bullock held an earlier assignment with NATO from 1956-58, when he served as chief of staff, Allied Land Forces Southeastern Europe, with headquarters at Izmir, Turkey. Prior to this assignment, he served for three

AMC Takes Command Of Watertown

Transfer of Watertown Arsenal, Mass., from the U. S. Army Missile Command to the U. S. Army Materiel Command (AMC) occurs today.

Since Aug. 1, 1962, Watertown Arsenal, near Boston, has been an element of the Missile Command which is a major commodity command of AMC. In April of this year, the Defense Department announced plans to gradually phase out operations at Watertown Arsenal and turn over to the General Services Administration by September 1967 that part of the property not required by the Army Materiel Research Agency (AMRA).

AMRA is an element of AMC and is a tenant at Watertown Arsenal. It was not included in the phaseout order for the Arsenal itself.

Placing Watertown Arsenal directly under AMC will provide a means of effecting closer coordination and control of personnel and other actions required to balance the workload at Watertown and to provide a proper transition to AMRA during the phasedown period. Placement of Watertown Arsenal career civil service personnel in other jobs or retraining them to qualify for continued federal employment, for example, can be more effectively accomplished under direct AMC control.

The new action will now bring under central direction all AMC elements affected by the Watertown Arsenal phaseout.

The July 1st date to effect the change was set to coincide with the beginning of the new fiscal year in order to simplify accounting and financial procedures.

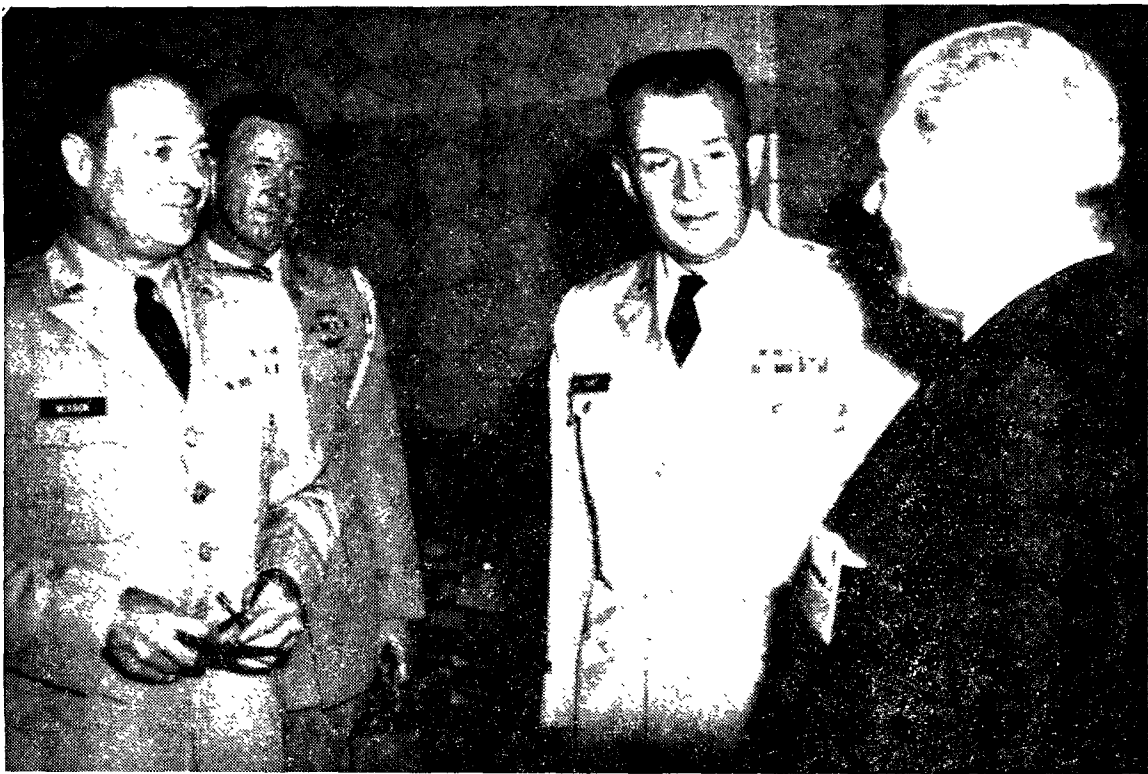

years as chief of Psychological Warfare, a special agency of the Department of the Army.

As director of an atomic training exercise at Desert Rock, Nev., Gen. Bullock directed troop participation in the spring series of atomic tests of 1953, including the firing of the atomic cannon in May 1953.

He holds an M. A. degree from the University of California and is a graduate of the Command and General Staff College and the National War College.

A veteran artilleryman, Gen. Bullock served as a division artillery commander and later was assigned to the Eighth U. S. Army during the Korean Conflict. During World War II he led a field artillery observation battalion ashore on D-Day and later became executive officer of the VII U.S. Army Corps Artillery and campaigned with this unit through France, Belgium and Germany.

His decorations include the Legion of Merit with two Oak Leaf Clusters, the Bronze Star Medal and the Croix de Guerre with Palm

AT VALUE ENGINEERING SEMINAR—Gen. Frank S. Besson, left, Commanding General of the Army Materiel Command, was on hand last week to talk Value Engineering with George E. Fouch, right, Deputy Assistant Secretary of Defense. Center is Maj. Gen. John G. Zierdt, Commanding General of the Missile Command. Standing behind Gen. Besson, is Maj. R. D. Descoteau, Aide-de-Camp. The officials met at the Army Missile Command during a special seminar on Value Engineering.

in addition to numerous campaign ribbons. Accompanying the general to Fort McPherson was his attractive wife, the former Flora Elizabeth Karsell of Evansville, Ind.

Commandant Asks Community To Tell Foreign Students The American Story

Organizations and individuals throughout the Tennessee Valley area are being invited to join the Huntsville-Madison County Chamber of Commerce and the Army Ordnance Guided Missile School in a program to give foreign students and visitors to the area a true picture of the American way of life.

Speaking at a meeting of the Chamber June 24, Col. William J. Macpherson, Missile School Commandant, and Major Monroe Webb, chief of the Foreign Liaison Branch at the School, urged local civic clubs to provide a personal touch to hospitality shown to foreign students and visitors to Redstone Arsenal and Huntsville.

John Rodenhauser and T. Pic-

kens Gates of the Chamber of Commerce were appointed to meet with the Civic Club Council in an effort to provide more than the "military image" that foreign visitors often get in short visits to the area. Among other programs proposed, a sponsorship program was agreed on whereby visitors would visit in homes of local families.

COSERV, the international organization which provides information and assistance to foreign visitors in this country. There are COSERV groups in 67 U. S. cities. Headquarters for the national organization are in Washington, D. C., and the group has White House support.

It was also suggested that the Chamber of Commerce provide

speakers to visit other civic clubs to explain the program and solicit wider support from clubs throughout the area.

The program was viewed as important in light of the 600 foreign students at the Missile School, the Marshall Space Flight Center at the Arsenal and visitors to the

Huntsville industrial area each year. Foreign enrollment at the School will rise to about 900 during the summer, and many of the students will bring their families with them.

Interested groups may contact Maj. Webb at the Foreign Liaison Branch, USAOGMS.

CAPT. SAFRON S. CANJA

Capt. Canja Appointed Aid-de-Camp

An Army officer with 10 years experience has been named Aide-de-Camp to Maj. Gen. John G. Zierdt, Commanding General of the Army Missile Command.

He is Capt. Safron S. Canja whose last duty assignment was at Kwajalein where he served in the Nike-X Project Office.

Capt. Canja steps into the post formerly held by Capt. Jerry Patterson who is leaving for advanced ordnance schooling at Aberdeen Proving Ground.

Born in Walkerville, Ontario, Canada, Capt. Canja is a graduate of East Technical High School in Cleveland, Ohio. He obtained his B. S. Degree in Education from Ohio State University.

Since entering the service in 1954, Capt. Canja has been stationed at Fort Knox, Ky.; Fort Benning, Ga.; Frankfurt, Germany and served a three year tour at Redstone Arsenal from 1959-61 prior to transferring to Kwajalein.

He is married to the former Marjorie Faye Beene of Warner Robins, Ga. They have two children.

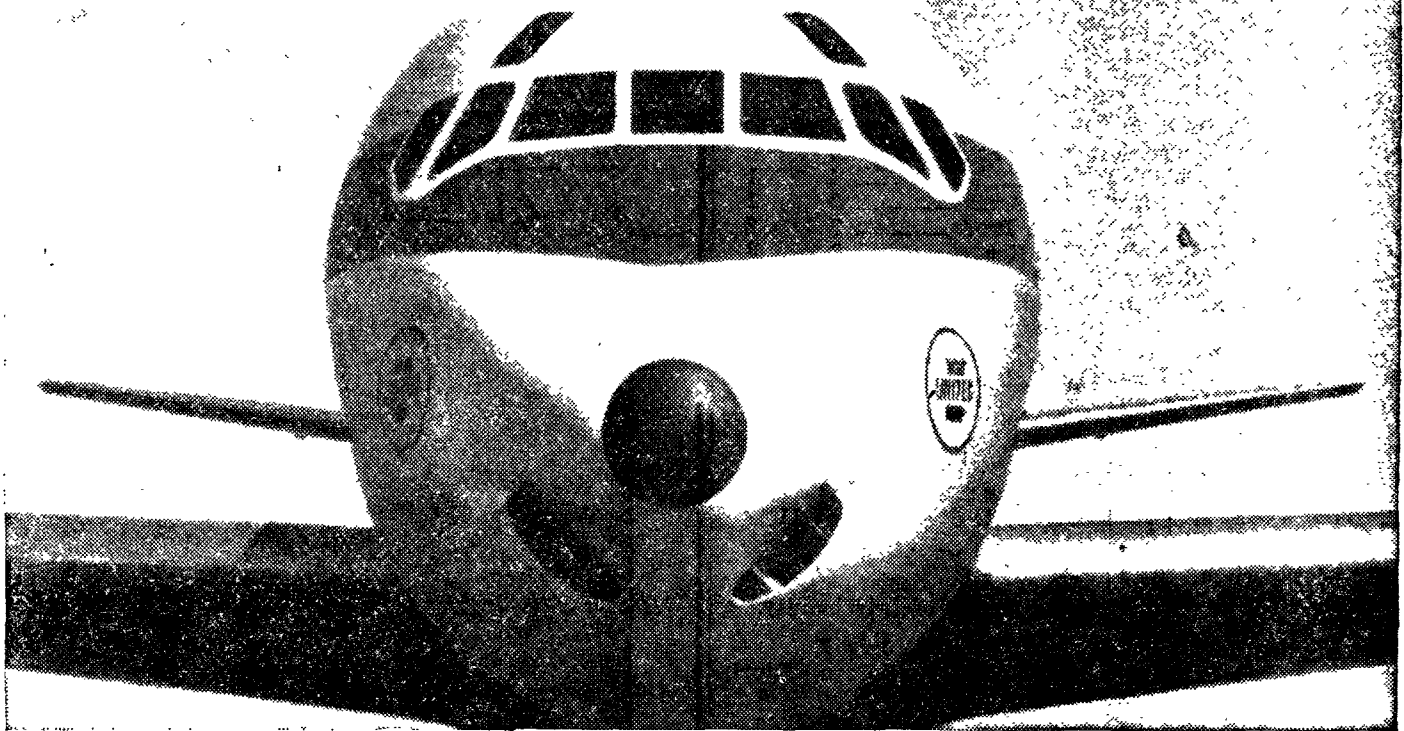

The Army's Corps of Engineers has recently released some 2,000 Argentine flea beetles into the Savannah National Wildlife Refuge. This is an experiment in the control of the channel-choking alligator weed, which is a serious impediment to navigation and stream flow in 3,000 miles of inland waterway from North Carolina to Texas.

THE NATION'S LARGEST AIRLINE / KNOWN FOR EXTRA CARE

Headquarters Gives Away Runs But Remains On Top

By Jay Silverman

The Headquarters, AMSC, girls' softball team celebrated Christmas early this year. Their gifts included 7 unearned runs, but the happy recipients of this gift-giving, Procurement and Production's girls, could not take full advantage and lost a thriller, 13-12, last Tuesday night in a Civilian Girls Softball league game.

P&P, host team for the night, held Headquarters scoreless in the top of the first, then capitalized on four hits and three big Headquarters errors to lead 6-0 at the end of one inning. The big hit for P&P was Frances Bogue's 2 run single.

Headquarters, stung by their lack of both hitting and fielding in the first, came back to score twice in the top of the second, as Freda White singled in both runs. Then, after holding P&P scoreless in the bottom of the second, Headquarters dented the plate twice more in the third, cutting the P&P lead to 2 runs.

P&P was determined to stay in front, though, and in the bottom of the third, consecutive singles by Hill, Newton, Neal and Poe brought in 2 more P&P runs, making the score 8-4 at the end of three frames.

But, just when all seemed to be sunny for the P&P ponies, great black clouds descended. Two walks, sandwiched around an error, loaded the bases with Headquarters runners. Marie Sexton then hit a long fly ball to left, which was muffed, and three runners galloped to pay dirt, with Marie ending up on third. A moment later, she crossed the plate with the fourth Headquarters run of the inning, tying the score at eight and eight.

P&P came right back to break the deadlock. Three hits, a fielder's choice, and another Headquarters error accounted for 2 big runs, and P&P led 10-8 at the end of four innings.

Headquarters came within one run of tying the game up again in the fifth as Freda White led off with her second hit of the night, a single. She advanced to second on a walk, and came all the way around to score on an error. At this point, the score read P&P 10, Headquarters 9.

P&P went down 1-2-3 in their half of the fifth, and Headquarters, perhaps heartened by this turn of events, came out to take a lead that they were not to relinquish. Fran Foster led off with a single. Marie Sexton followed this with a single and Gene Ventress walked, loading the bases. Margaret Stagner, a welcome new addition to the Headquarters lineup, then poled a pitch to deep right center for a grand slam home run, and the league leaders forged into the lead for the first time, 13-10.

P&P was not to be counted out yet, however. They scored twice in their half of the sixth, held Headquarters scoreless in the top of the seventh, and came up for their last bat needing only 1 run to send the game into extra innings, or two to win.

But the one run lead held by Headquarters proved to be too big however, as "Fearless Fran" Foster, the Headquarters hurler, proved again to be tough in the clutch, and held P&P scoreless in

the last inning. With the final out, Headquarters staggered off the field with another hard-fought notch in the victory column.

If ever a moral victory has been won, P&P certainly won it Tuesday night. Although the scoreboard didn't indicate such, P&P outhit, outfielded, outplayed the league leaders. Among P&P's 16 hits, Kaye Neal had a perfect 4 for 4 night at the plate, and Frances Bogue also chipped in with four hits. Wilma Daly played a tremendous game at shortstop for her team. Headquarters had no star for the night, but four girls had two hits each — Doris Squires, Marie Sexton, Freda White and Fran Foster. Margaret Stagner provided the game winning blow with her grand slam home run, and played a fine game in left field, including a fantastic catch of a long wind-blown fly ball.

* * *

Silverman's

Scribblings

There was an unusual number of girls decked out in blue and white shirts on the field with F&A Tuesday night, and a few people have asked about it . . . CSD finally has a team, and had it not been for the rain downtown Tuesday night, Finance would have been playing instead of winning by forfeit . . . Ed Maneely, coach of the CSD team, says that he will have a full team out from now on, however, and even though his team has sustained 6 losses because of forfeits, his girls WILL win the league . . .

An All Star game is being suggested by this writer, subject to league approval . . . The All Star team from the Women's league, picked by the coaches, would play the league leader from the men's division . . . Sound unfair? Then how about having the men bat switch handed, for example, all right handers would bat lefty . . . See you at the games every Tuesday night at 5:15.

LOVELL, MULLINS WIN GOLF GROUP COMPETITION

In Blind Partners competition Mrs. Gary Lovell and Lella Mullins were first Wednesday during play of the Golf Group sponsored by the Redstone Arsenal Officers Wives Club.

Second couple was Mrs. William Waschler and Ms. H. D. Frear followed by Mrs. Stanley Tyler and Mrs. Lloyd Deppensmith. The Golf Group tees off in competition at the Arsenal course every Wednesday.

Dick Sullivan Shoots Best Junior Golf

Dick Sullivan won the Blind Bogey tournament during the Tuesday competition among the Arsenal's Junior Golf Group.

Runnersup were Chuck Graham and Pat Sullivan who tied for second place.

Mrs. E. O. Sentar is chairman for the Junior Golf Group which is sponsored by the Redstone Arsenal Officers Wives Club Golf Group.

Drownings High; Safety Tips Listed

With the opening of the summer swimming season, the American Red Cross has published some good safety tips. The high death toll due to drownings can be reduced, since virtually all drowning accidents can be avoided. Here are ten good rules to follow:

Learn to swim. If you can swim, learn to swim better.

Always swim with a buddy, never alone.

Swim where there are lifeguards on duty.

Recognize your limitations. Your endurance is not as great now as it will be after a summer in the water.

Don't depend on inflated tires tubes, and other flotation devices

B Company Wins 17 Games In Arsenal Softball League

One run is as good as a hundred when it means winning the game is the attitude that has led B Company to a record of 17 wins in as many starts in the Redstone Softball League.

In posting their imposing string of victories the OGMS team has been extended to the limit in almost half of their games. But each time B Company hitters have been able to deliver the hits and make the defensive plays that spelled the difference between winning and losing.

In a pair of games played last week the leaders were up to their old tricks on two different occasions. On Wednesday night they outscored Hq. UTC for an 8-6 win and the next evening they took a hard fought 2-1 decision from A Company.

Charlie Gunn had the leading role in the former as he turned in a sterling one-hit performance to shade Ed Waldrup who tossed a four-hitter himself. Three of the four safeties came together in the fourth inning as B Company scored both of their runs.

The second place Officers fell another game off the pace when they dropped a 11-10, extra-inning affair to the MPs after winning encounters with Support Command and C Company.

The loss was a heart breaker for the Officers who had come from way back to tie the game. Back to back home runs in the 7th inning forced the game into extra innings.

The only other double winner of the week was the 184th Ordnance that claimed a 15-6 win over 4th ETC and a hard fought 17-13 conquest of Hq. UTC.

In the latter game Shelby Eiland took care of the offensive fireworks with a quartet of safe blows

to keep you safe if you can't swim.

For distance swimming in open water, take along a companion in a boat.

Don't swim immediately after eating, when overtired, or when overheated.

Stay away from under diving boards when you are in the water.

Stay out of water during electrical storms.

Before diving, check to see if water is deep enough and make sure it contains no hidden objects.

including a double and a home run. Jim Harmon homered in the losing UTC cause.

The MPs made it two for two when they mauled MICOM to the tune of 20-6. The two wins have given an indication to the rest of the league that the MPs have finally found their hitting strength and are going to be tough for anyone to handle the rest of the way.

The remainder of the weekly card saw C Company hand the Medics a 14-4 pasting and Support Command turn in a 3-2 verdict over C Company.

The Standings

Team	Won	Lost
B Company	17	0
Officers	12	3
184th Ord	13	5
C Company	10	7
A Company	8	6
Support Command	8	8
291st MPs	6	9
Hqs, UTC	5	12
Medical Det.	5	12
4th ETC	3	14
MICOM	2	14

Counts Costs

Little things matter, Especially this seems to be so in cost cutting.

A significant example of little things adding up to big savings was announced last week at the Army Ordnance Guided Missile School by Allen C. Metzger, cost reductions co-ordinator for the school.

A small modification in tuning coils worked out by SFC Felton G. Collins of the advanced circuits section of the Missile Components Branch, has resulted in a quarterly savings of \$290. This is a recurring cost avoidance, Metzger said, which will amount to more than \$1,100 a year.

The modification is used in basic electronic instruction and has reduced the number of coils burned out by students from 112 to 40 a quarter. The coils are used in the precision soldering classes.

BIOGRAPHIES OF VEHICLES—(Left to right) Bobby L. Henry, Anthon Lawson and Warner O. Staton find that keeping up with the biography of the vehicles on post keeps their pencils in action at least eight hours a day. Every time a vehicle is serviced—except for gas and oil—the action is posted. The log covers everything from new tire to complete overhaul.

HISTORY OF EQUIPMENT—Engineering equipment and mechanized systems used with missiles receive the same treatment as vehicles—a biography is posted every time a loose nut, bolt or other ailment sends the item to the maintenance shop. In this manner, the Maintenance Support Division of the Army Missile Support Command can tell whether things are costing more to keep than they are worth. Men who keep these records are (left to right): Henry V. Parks, J. B. Copeland and Clyde Whittaker. Parks and Whittaker keep track of engineering equipment; Copeland of missile systems.

Logbook Shows History Of All Army Vehicles

Leadfoots, hotrods and careful drivers leave a signature to be read by anyone interested in the vital statistics of a vehicle. The story is reflected in the log books in the Maintenance Support Division of the Army Missile Support Command. Past history shows that before an upheaval in organization, the Transportation Division kept these records. The biography of a vehicle shows that the average life for a sedan, pickup or other light vehicle is six years, for a two-and-one half ton truck the lifespan extends to eight years. Then, the maintenance costs begin to mount to prohibitive heights in comparison to the worth of the vehicle and it ends its Army career in a salvage yard—put to pasture like a worn out race horse who is only ridden for exercise. Most buyers don't expect racing power from either. A new sedan, like any newborn's record, is scanty. It may have the acceptance inspection posted and perhaps a few minor adjustments to lights and such, but the cost is almost nil. On the other hand, some sedans in use 24-hours a day may have as many as four or five waivers—show all kinds of expenses against it including tow jobs, new transmissions, and a complete tire

change every six months. Here the cost runs into comparatively astronomical figures because it is more than the cost of the original vehicle and the mileage indicates that the speedometer might flip beyond capacity before the next visit to the shop. It takes three men to keep track of all this. They average about five postings to 1500 logbooks every month. Bobby L. Henry of Fayetteville, Tenn., has been keeping these records for about six years. His two co-workers, Warner O. Staton and Anthon Lawson, have a year less although Staton worked for the Air Force before he joined Army transport maintenance. The records in this area reflect only maintenance on materials handling equipment and transportation for people or things. Engineer equipment such as generators and caterpillars get the same historical treatment but it takes two other men to keep abreast. They are: Henry V. Parks and Clyde Whittaker. A third man works in their area on the mechanical breakdown of missile equipment. He is J. B. Copeland. It may be hard to believe, but a truck, a sedan, or a caterpillar gives some people writers cramp.

U. S. Series E Savings Bonds are good to have as emergency funds. They can be converted to cash whenever you need it, anytime after the first two months.

Title Policy Search Important In Home Buying

With the peak of the year's sale of homes coming up now, in the summer and the fall, the Army Materiel Command Staff Judge Advocate offers this vital information: You or a member of your family might be thinking of buying a home. An attorney should always be consulted before any money is paid, and, of course, before any papers are signed—including the sales contract. You would not perform surgery yourself—that's a job for a surgeon. Why, then, buy a house, bind yourself to a complicated legal contract, and invest thousands of dollars without protecting yourself with the services of a lawyer? Your attorney will strongly advise that title search should be made of the property and a title policy purchased. A title policy bought at the time you get ownership of property is one of the best investments you will ever make. The cost varies, depending on the cost of the property, but a home priced at \$20,000 would have a \$150 title policy fee, figured roughly. Your attorney will also aid in insuring that your purchase is made on time, that you are protected against most defects in the condition of the property, and that financing your loan is not prohibitively expensive. This \$150 investment guarantees you against all disputes as to ownership of the property. If the title to the property is defective, the insurance company will make good the loss you sustained by buying the property from someone who is not the rightful owner. Examples of defective titles are prior mortgages, old tax bills, deeds obtained by fraud or forgery, loss of title by non-use of property. Unlike auto, fire, life, and other types of insurance, the initial payment constitutes full payment for the life of the policy. It is not something you will have to continue paying month after month, together with the cost of the house. Although it is the exception rather than the rule that there would be anything wrong with the title of the property you buy, such pitfalls do exist, and you might be the unlucky one and draw a deal that backs you into a legal corner. Certainly, if as most of us do, you spend about \$100 yearly to protect your nearly \$3,000 investment in an auto, it is sound advice to protect a \$20,000 investment in a home with title insurance when it comes so cheaply.

At The Service Club

By: Brenda Hanson

In keeping with the changing seasons, what with June making its exodus and July its summery entrance, the Service Club has scheduled outdoor activities.

The meeting of the E. M. Council will be held in the Small Lounge Wednesday at 2 p.m. Smoker Poker begins at 8 p.m. If you prefer a more passive pastime, the TV set will be in operation.

Thursday, we send out a beacon to all bridge players. The weekly meeting of the Bridge Club will begin in the small lounge at 7 p.m. Come enjoy an evening of quiet anticipation along with the other bridge players. If you are interested in learning to play, instructions will also be given.

Friday we will celebrate the 4th, Independence Day, sipping coffee, eating donuts and listening to the "Stars and Stripes Forever." Later, we'll dance. Art Hetter will spin the latest labels from 7 o'clock until 9:30. Plan to attend the 4th of July Record Dance.

Saturday, we will open the club at 1:30 p.m., and brew a pot of coffee. In the evening we have a very extensive selection of games, take your choice.

Sunday morning Coffee Call is 9 a.m. at the club. Coffee and donuts for the late risers, and a background of fanciful melodies to brighten the day. It's here for you. Enjoy it. Sunday night, we will dance to records. Requests for a record hop have been received. We are glad. The dance will be a "Heat Wave Swing."

Monday night should prove gay. We have an evening of games planned with a beautiful array of nice prizes. This seems to be one of our more interesting programs as the attendance for these games are always tremendous.

How are you at table tennis? Care to prove your adroitness at this game? Or maybe you are one who just likes to watch a fast game. Tuesday evening a contest is scheduled at 8 p.m. Prizes will be awarded.

You can see there is always something doing at the Service Club. Join us.

TOASTMISTRESSES MEET TONIGHT—Newly elected officers for the Huntsville Toastmistress Club will preside tonight at a dinner meeting at the Russel Erskine Hotel. Left to right are: Miss Marion Hocker, president, Missile Support Command Personnel Office;

Mrs. John Haire, Jr., vice president, Huntsville News; Miss Nell Curtis, secretary, Chrysler; Mrs. Martha Perkins, treasurer, Production and Procurement Directorate Documentation Division; and Mrs. Barbara Ray, club representative, IBM.

Bloodmobile Collects June Quota

The June visit of the American Red Cross Bloodmobile to Redstone Arsenal filled the quota plus last week.

From 542 donors, 527 pints of blood were collected. Col. William Luk and his staff at Troop Command coordinate the Arsenal visits with the civilian and military agencies on post. He is assisted by George Parker of the Missile Support Command.

The Space Flight Center had the highest percentage of donors in June.

Summer Employees To Attend Lectures

College graduate and undergraduate students and faculty members of both high schools and colleges who are employed by the Army Missile Command and Mar-

shall Space Flight Center this summer will be provided with a summer lecture series in aero space science and engineering during July and August.

The lecture series, a joint project of the Missile Command and MSFC will be conducted each Monday and Friday from July 13 through August 28.

Purpose of the 20 lectures is to relate engineering and scientific functions as seen on the job to those taught and learned in the classroom.

The series, opened by Dr. Werner von Braun and to be closed

by Maj. Gen. John G. Zierdt, will feature eight other Army personnel.

These are Dr. Alfred Daniel Physical Science Laboratory; Dr. W. C. McCorkle, Director, Advanced Systems Laboratory; W. V. Gudaitis, Deputy Director, Guidance and Control Laboratory; R. C. Haraway, Electromagnetic Laboratory.

Ray Farmer, Electromagnetic Laboratory, R. Sedlak, Structure and Mechanics Laboratory; T. A. Barr, Physical Science Laboratory and William Lindberg, Chief, Advanced Projects Agency Division.

Births At Post Hospital

Brian Lewis Breeden, 8 lbs., 5¼ ozs., June 19, son of Sp5 and Mrs. George R. Breeden.

Marc Henniges, 7 lbs., 10½ ozs., June 21, son of Sfc and Mrs. Hubert Henniges.

Franklyn Wynne Paris II, 7 lbs., 13 ozs., June 22, son of 1/Lt. and Mrs. William F. Paris.

Tyrone Paul Norwood, 5 lbs., 7½ ozs., June 22, son of Sfc and Mrs. Paul L. Norwood.

Margaret Lyne Price, 6 lbs., 13 ozs., June 22, daughter of Sp4 and Mrs. Marlin Price.

JUNIOR STAMP CLUBS

Mrs. Gilbert Penny, president of the Rocket City Stamp Club, has announced that the club will sponsor Junior Stamp Clubs in Huntsville.

She asks that boys and girls under 16 who are interested in joining a stamp club send their names, addresses and age to her. She would like to know whether or not the individuals are collectors at present.

Can U. S. Savings Bonds be used as loan collateral? No—and for your own protection. No one can redeem Savings Bonds except that person to whom bonds are issued, or the legally authorized guardian or custodian for that person.

NEW POSTS ANNOUNCED — The resignation of Henry Cabot Lodge as U. S. ambassador to the Republic of Vietnam has been accepted by President Johnson. The president has appointed Gen. Maxwell D. Taylor (center) to replace Lodge as ambassador and Gen. Earle G. Wheeler (right) to succeed General Taylor as chairman of the Joint Chiefs of Staff.

Col. G. P. Lerner Named To Manage CCIS-70 Project

General Frank S. Besson, Jr., Commanding General, U. S. Army Materiel Command, has announced the appointment of Col. Gerald P. Lerner as Project Manager of the Command Control Information System (CCIS) 1970.

Established by the U. S. Army Materiel Command to manage the development, test and production of tactical automatic data processing systems for the field Army, this project will put computers on the battlefield. Its tactical objective is to give the commanders and staff officers whatever command information is needed quickly enough to beat the enemy to the punch. Five major ADP subsystems are involved: fire support, intelligence, personnel and administration, logistics, and tactical operations centers. Plans call for them to become available in quantity in the 1970 time frame.

Col. Lerner as Project Manager reports directly to the Commanding General, AMC. Prior to this assignment he served as Chief of Staff of the U. S. Army Electronics Command, Ft. Monmouth, N. J.

He has had wide experience in the rapidly expanding military use of automatic data processing which will have central importance in his new assignment. Col. Lerner was first assigned to the Electronics Command in January, 1963, as Chief of the Communications and Automatic Data Processing Commodity Office.

Born in Dewey, Okla., in 1914, Col. Lerner was graduated from the University of Illinois in 1935 with a bachelor of science degree in electrical engineering, and at the same time was commissioned a second lieutenant in the Army Signal Corps. He also holds a master's degree in business administration from Harvard University, and is a graduate of the Command and General Staff College and the Armed Forces Staff College.

Col. Lerner entered active Army service in 1940 as assistant professor of military science and tactics at Texas A&M College. From October, 1944, to June, 1945, he was Signal Liaison Officer with the Chinese 8th Army. Upon his return to the U. S. he taught military science and tactics at the University of Kentucky. He later served in Korea and the Office of the Chief Signal Officer, Washington, D. C. In the latter assignment Col. Lerner had major roles in initiating Army programs in automatic data processing systems, and in advanced communications techniques, including communications satellites.

He subsequently became program manager for the Mobile Digital Computer (MOBIDIC-7A) for the 7th Army Stock Control Center in Europe. MOBIDIC was the Army's first full-scale militarized digital computer to be tactically deployed.

Col. Lerner will succeed Col. A. Q. Smith who is being reassigned to Headquarters, EUCOM, Paris, France.

Lodge Resigns; Taylor Named Vietnam Envoy

WASHINGTON (AFPS)—Henry Cabot Lodge has resigned as Ambassador to the Republic of Vietnam and President Johnson, who made the announcement, also disclosed that Chairman of the Joint Chiefs of Staff Gen. Maxwell D. Taylor will succeed Mr. Lodge.

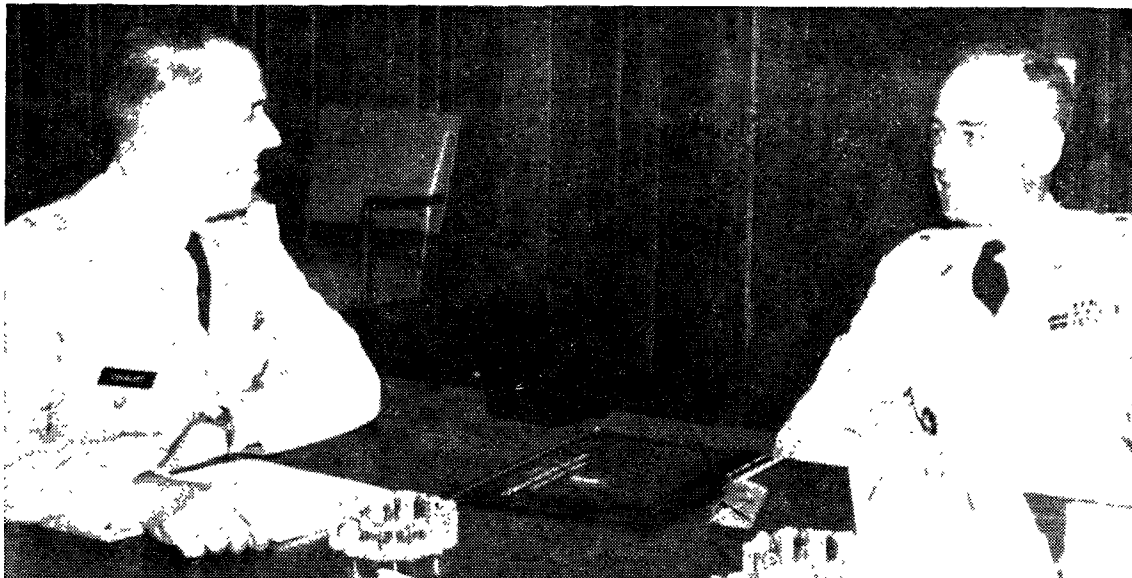

The President said that Ambassador Lodge, who submitted his resignation June 19 for personal reasons, will be temporarily replaced by veteran diplomat U. Alexis Johnson. When General Taylor arrives in Saigon, Mr. Johnson will fill the specially created post of Deputy Ambassador to the Republic of Vietnam.

Moving up to fill General Taylor's vacated post will be Army Chief of Staff Gen. Earle G. Wheeler. The President said "several men" are under consideration to succeed General Wheeler.

President Johnson said that his choice of men to replace Mr. Lodge was intended to reassure the South Vietnamese that Mr. Lodge's departure would not affect the United States commitment to the fight against Communist guerrillas.

General Taylor is a former Army Chief of Staff. He was graduated from the U. S. Military Academy at West Point and dur-

ATTENTION J & K BOND HOLDERS—U. S. Savings Bonds Series J & K dated May 1952 through April 1957 began maturing May 1964. No Graduation Is News

Last Friday was a rare June day indeed at the Army Ordnance Guided Missile School here. There

This was unusual because the "Missile Academy" which trains some 5,000 students a year seldom has a week when at least one class is not completing a course.

Staff and faculty who have become accustomed to tuning up the band, breaking out the colors and laying on the protocol to 50 Fridays every year, felt empty.

There was no graduation because the Missile School has virtually completed its workload for the Army's fiscal year 1964 which ended at midnight last night.

"What do you do on Fridays when there is no graduation?" a young private in the Information Office asked a sergeant.

"Prepare for the big one coming up," came the battle-weary answer.

Things will get back to normal

Selective Safety Program Presented To Contractors

More than 50 high-level representatives of contractor firms working on Redstone Arsenal have been told that contractor activities have an important bearing on the installation's safety program.

The occasion was the second semi-annual safety meeting conducted at the Post Theater. Officials of the Army Missile Support Command's safety office, the Provost Marshal and the Fire Marshal appeared before the group to urge the contractors to work on a 'selective safety program.'

As envisioned by installation safety officials, an effective contractor safety program would be aimed at pinpointing "causes of accidents" and a continuing education program designed to point up potential hazard areas.

Delegates from the contractor firms were welcomed by Col. W. F. Register, Deputy Commander of the Army Missile Support Command. During his remarks, Col. Register noted that statistics show that 88 per cent of lost-time accidents are caused by mistakes made by personnel—and 12 per cent by failure of machinery.

Redstone Arsenal Fire Marshal William H. Klieber pointed out possible danger areas that tend to accumulate around construction sites. He noted such things as oil-soaked rags, gasoline, and cigarettes.

Bob Seavers, of the AMSC Safe-

ty Office reviewed accidents during the 1963-64 period, and pointed out that six persons have been killed in accidents on the Arsenal

during that time. He noted that five of the six persons fatally injured were employees of contractor firms.

In outlining points related to safety, Seavers said contractors should:

- conduct regularly scheduled safety meetings
- inspect equipment before use
- know installation require-

- ments for any given job
 - enforce and observe safety rules
 - beware of unsafe acts
 - work as safely as personnel know how
 - report unsafe conditions
- Topping off the meeting were

brief remarks by Col. William Luk, Provost Marshal and Troop Commander, who urged the contractors to work for a "selective safety education program" to make personnel aware of danger areas such as intersections and aggressive drivers.

EDS-0009 To Soon Phone Information

EDS-0009, the Army Missile Command's Engineering Data System that can find a "needle" of information in a "haystack" of data, is being groomed for even bigger and better things.

Gilbert A. Penny of the Procurement and Production Directorate's Engineering Division says the system is being updated in both concept and operation.

Already capable of accepting information from practically any kind of document, storing the information, and presenting it almost instantly on demand, the EDS-0009 soon will be able to transmit the information to any point over standard telephone lines.

Work is now being done to update the system under a contract awarded recently to Brown Engineering Co. in Huntsville. Brown is the prime contractor for the system.

First of all, Penny said, an optical scanner is being added which will read printed engineering data and transmit it directly to the computer. Thus, writing data on punchcards by hand and manually keypunching these punchcards will be unnecessary.

Second, and of even greater significance, is a method by which the computer can prepare microfilm masters directly. The hardware for this method—a cathode ray tube and high speed camera—will take the information from the computer, display it on the CRT where it will be shot by the high speed camera and recorded on 16 mm microfilm.

This information can then be transmitted over standard telephone lines with a printed copy output at the point where it is needed.

Penny said the new concept will permit processing and recording of engineering data as it is being created in our laboratories by our scientists and engineers. Data sheets can be properly indexed and electronically printed in thousandths of a second.

A complete topographic map of the moon's visible features, prepared by the U. S. Army Corps of Engineers under an agreement with the National Aeronautics and Space Administration, has just been published. More than 5,000 surface features are listed alphabetically by longitude and latitude on the reverse side of the map sheet.

HALE BROS. *Emphasis*

Rich in Character Simple in Line

The emphasis is on character of design. Lines are clean, free and sophisticated. Imported, hand carved solid walnut pulls and incised carvings on door panels are boldly distinctive. Mitered mouldings on cabinet fronts are handsomely sculptured. The finish is a rich brown walnut veneer, emphasizing grain and depth. EMPHASIS is versatile, harmonizing with either modern or traditional decor, and functional, offering a wide variety of handsome pieces built for storage as well as appeal. Superb craftsmanship puts the emphasis on Premier quality at moderate prices.

Three Contracts Total 4½ Million For Missile Work

The U. S. Army has announced the award of three contracts totaling \$4,342,264 for work on the Hawk and Nike Hercules missile systems.

The Raytheon Company received two of the awards, one for \$1,878,574 for continued design and development of the Hawk anti-tactical ballistic missile, and a \$1,094,328 award to cover technical services and materials for field installation of Hawk missile system modification kits.

Work under these contracts will be performed at the company plant in Andover, Mass.

The Western Electric Company received \$1,369,362 for installation of modifications kits for the Nike-Hercules missile system.

Both the Hawk and Nike Hercules are operational missile systems. These missile programs are managed from headquarters at the Army Missile Command, Redstone Arsenal, Ala. Col. C. R. Graham is the Hawk Project Manager, and Col. R. M. Colquitt, Jr. is the Nike Hercules Project Manager.

The Hawk contracts will be administered by the Boston Procurement District, and the Nike Hercules award by the New York Procurement District.

CIVILIAN COMMENDED—The Army's Certificate of Appreciation was awarded recently to Charles W. Nelson, Technical Representative of Beech Aircraft Corp., who advises trained aircraft mechanics at Redstone Arsenal airfield. Maj. Gen. John G. Zierdt, Commanding General of the U. S. Army Missile Command, made the presentation with Mrs. Nelson looking on. Because of Nelson's technical skill and mechanical ability, Third Army has given special permission to the Redstone Aviation Branch to perform maintenance usually performed at Depot level. The award is the second of its kind to be presented at Redstone Arsenal.

Redstone's Dental Health Program Noted In Journal

The activities of Redstone Arsenal during National Children's Dental Health Week have been published by the Journal of the American Dental Association. Redstone Arsenal was one of four Army posts whose program was considered exceptional. The Bureau of Dental Health Education commented on the billboard

displays and the catchy slogans dreamed up by the Post Engineer artists. Five slogans were published. The Journal also reported the effects of the school bus posters on dissemination of information. Many of the posters found their way into homes of a group of children as collector items. An illustration of one of the flyers used in the Ordnance Guided Missile School and the Missile Support Command Daily Bulletins was published.

THIOKOL SAFETY CONTEST WINNERS—Three Thiokol-Huntsville Division employees, and Mrs. Ellen Smith of the Division's Safety Department, grapple for silver dollars . . . award for winner of the recent Name the Safety Cartoon contest. Merlin Larimer, Chemistry Department, left center, and Charles Smith, Pilot Lines Department, restrain Kenneth Smith, Reproduction, from the silver. Willie B. Rives, Reproduction, who is not shown, actually won First Place in the contest, but Kenneth says it was his idea. He was allowed to feel the silver dollars and then deliver them to Rives. Larimer and Smith won First and Second Place, respectively. The cartoon showed a happy father spoiling his child's birthday by falling with the cake while making a grand entry. Winning caption: "The thrill of it all can be spoiled by a fall."

TRADITION ENDS—Officers of Company "C"—formerly Company "C" (Signal) — cased the Signal Corps flag June 8, ending a tradition at the Army Ordnance Guided Missile School. Lt. Frederick Pinkerton, commanding officer, salutes as two of his subordinate officers fold the orange flag. The Signal company had established one of the most outstanding records in the 11-year history of the Missile School—including the highest score ever on a commandant's maintenance inspection. The company lost its signal designation in the reorganization of the Missile School that will be in full effect with fiscal year 1965.

SOUTHARD NAMED VICE PRESIDENT FOR ENGINEERING TECHNICIANS

An Army Missile Command employee, Donald J. Southard, has been elected vice president of the Southeast Region of the American Society of Certified Engineering Technicians (ASCET.)

Southard becomes one of seven vice presidents of the newly-formed organization.

The American Society of Certified Engineering Technicians was recently formed. It is sponsored by the National Society of Professional Engineers and is made up of engineering technicians who work alongside engineers.

Southard will head the Southeastern Region of the group composed of members who have passed a special review of qualifications prior to being eligible for membership.

Eligibility of potential members is determined by a joint board, composed of professional engineers and an equal number of engineering technicians, Southard said.

More than 2,000 engineering technicians currently hold membership in the organization and applications are received at the rate of 100 a month, the Southeast Region vice president said.

Southard pointed out that the certification method of selecting membership is being well received. "Many engineering and technical societies have shown interest to the degree of appointing representatives to the advisory council," he said.

Objectives of the new organization are to increase the status of its members in the eyes of industry, to improve the service of its members as a vital component of the engineering and scientific fields, and to establish cooperative relations with other societies.

Engineering technicians interested in joining the new organization may contact Southard at 318 Harold's Drive, N. W., Huntsville.

Vecchietti Will Talk At AOA Lunch

The National Aeronautics and Space Administration Director of Procurement, George J. Vecchietti, will be the guest speaker at the July 8 meeting of the American Ordnance Association. The event will be a luncheon at 12 o'clock noon in the ballroom of the Redstone Arsenal Officers Club, and will last one hour, until 1 p.m.

Vecchietti's subject will be "Differences in Department of Defense and NASA Procurement Concepts and Techniques."

The guest speaker received his LLB degree from Catholic University of America in 1940 and began law practice in Washington, D. C. in 1941.

During World War II, he served in the Army Air Corps as an instructor-pilot and as a fighter pilot. In 1945, he resumed his law practice and joined the American Commercial Co. as counsel and later became the vice president.

He entered government service with the Munitions Board, Department of Defense, in 1951 and transferred to the Department of the Air Force in 1953, where he became deputy for procurement policy in the Directorate of Procurement and Production, headquarters USAF. He also served as a policy member on the Armed Services Procurement Regulations committee for six years.

Vecchietti transferred to NASA in 1960 as assistant director and progressed through deputy director, Office of Procurement, NASA headquarters, to his present position.

Luncheon reservations may be made by telephone only by calling Mrs. Wisner, 876-6954, (MSFC); Horace Lowers, 876-8736 (Army); and A. A. Demetriou, 539-3711, ext. 203 or A. F. Wild, 881-1640, (industry and off-arsenal).

OUTSTANDING INSTRUCTOR

First Lt. Carl G. Davis of the Ordnance Guided Missile School's Nuclear and Logistics section, was named Outstanding Instructor of the Month by the School's Officer Training Branch.

Lt. Davis, who has been instructing at OGMS since 1962, is a graduate of Georgia Tech University.

WINNER AND MENTOR—Richard Bennett, a National Science Fair Winner from Norte del Rio High School in Sacramento, Calif., visited Redstone Arsenal during a nationwide tour. His physics and trigonometry instructor, Mrs. William C. Chilcott, is accompanying him. At the Army Missile Command Directorate of Research and Development, they talked with John McDaniel, the Technical Director, who said of Bennett that his grasp of technical subjects is "nothing short of remarkable" for a high school student.

Navy Sails Landlocked Ship

The first U. S. Navy unit to get the most advanced supersonic guided missiles, accompanying radars and assorted equipment sails a sea of sand dunes, cactus and tumbleweed.

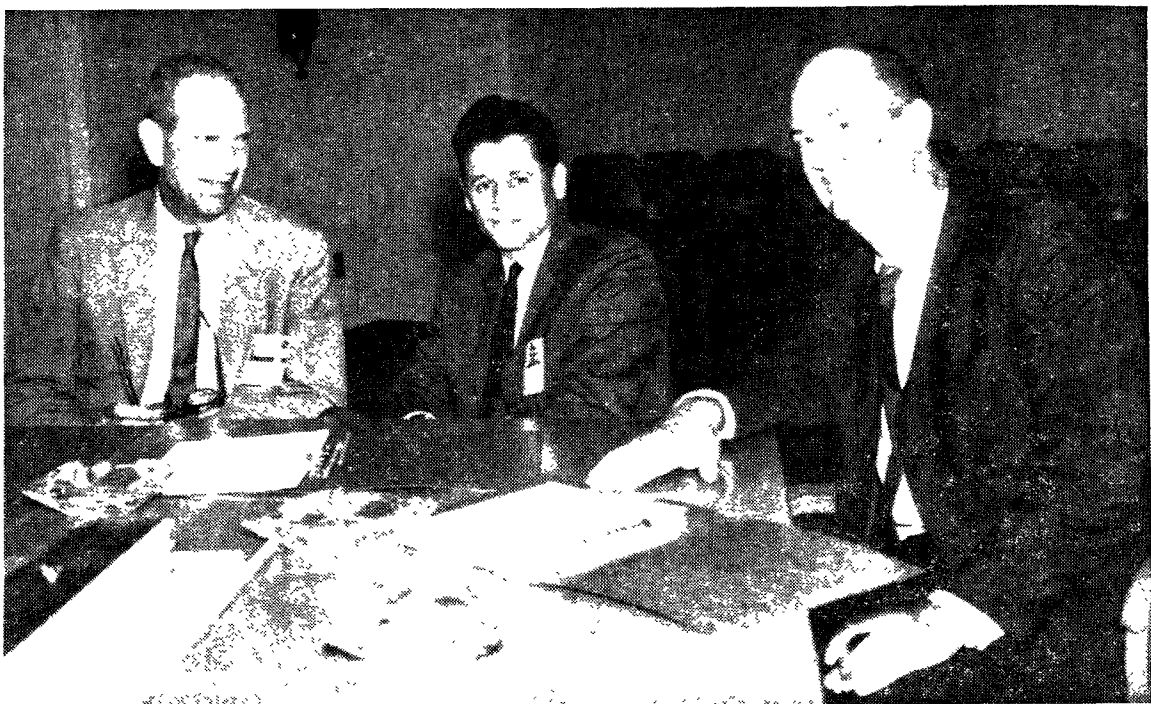

It is the USS DESERT SHIP (LLS-1)—LLS denoting Land-Locked Ship—in the Southcentral New Mexico desert at the White Sands Missile Range, a center of U. S. Army Materiel Command activity.

USS DESERT SHIP is a concrete building belonging to the Naval Ordnance Missile Test Facility. It has all the attributes of the Navy's deploying units, except that it goes nowhere. Special instruments simulate the roll of waves, and it has "decks," "bulkheads" and "ladders" to make its gunners mates, yeomen and other

sailors feel right at home.

The LLS-1 tests new and more modern versions of TALOS—The Navy's surface-to-air guided missile—the armament used by the Navy's newest guided missile cruisers. It also tests new radar systems.

Included in the DESERT SHIP facilities are missile assembly and checkout buildings, machine shops and a tall, slender steel tower used to launch the Aerobee upper atmospheric research rocket. The sailors assemble and fire the research vehicle for probes into space, providing atmospheric information for the National Aeronautics and Space Administration, U. S. Air Force, the Naval Research Laboratory and other Government and scientific agencies. LLS-1 facilities have fired more than 600 missiles, rockets and test vehicles since it was built in 1953. It is one of the leading weapons research branches of the Sea Service.

COMPTROLLER POLICIES DISCUSSED—Technical Director John L. McDaniel (right) of the Army Missile Command's Directorate of Research and Development talks with Maj. Gen. William O. Reeder (USA Ret.) at left during a recent orientation visit to the Missile Command. Reeder, an instructor at the Army Comptrollership School at Syracuse University in New York, was accompanied by Robert C. Lowery from the Office of Comptroller and Director of Programs.

Universal Match Receives Pershing System Contract

The Army Missile Command announced the award of a \$4,337,411 contract to Universal Match Corp., St. Louis, Mo., for continued production of the Pershing missile system's Transporter-Erector-Launcher.

The contract will be administered by the St. Louis Procurement District.

The Pershing, now being deployed to Europe, was developed by the Army Missile Command's Pershing Project Office. Project Manager is Col. Edwin I. Donley.

The Pershing is a two-stage, solid propellant missile system capable of ranges up to 400 nautical miles.

Lt. Olen Phipps Commands 2nd ETC

Lt. Olen C. Phipps Jr. has been named commander of the 2nd Enlisted Training Company in the School Troop Command at the Ordnance Guided Missile School.

He replaced Lt. Phillip W. William, who will in turn replace Lt. Phipps in the S/2-S/3 section of STC headquarters.

Lt. Phipps is a graduate of Tennessee Tech at Cookeville, Tenn. He was a member of the Scabbard and Blade, honorary society of the Reserve Officer Training Corps at college. Before entering the Army in October, 1962, he worked as a supervisor on the Southern Railway system.

The number of kids it holds has never been settled.

The Volkswagen Station Wagon is a good four feet shorter than conventional wagons. Yet it holds more than the biggest wagon you can buy. (Herbert, stop that this minute!)

It holds an army of kids. Or 8 adults: the seats are 5 feet wide. (Herbert, don't you dare!)

Take out the middle and rear seats, and you can carry a seesaw, a slide, a rocking horse. (Wait till I tell your father!)

Keep the rear seat in and you can still carry

bigger things than you could in a conventional wagon. A crib or a baby carriage. An open playpen. They fit easily through the wide side doors. (Herbert!)

Behind the rear seat, there's room for 9 or 10 pieces of luggage. Easy to reach through the back door.

- New 1500 Engine
- 25% More Horsepower
- Average About 24 M.P.G. on Regular Gas
- Cruising Speed 65 MPG
- Average Tire Mileage 35,000 Miles
- Seats 8 Adults Plus 28 cu. ft. luggage space
- Air Cooled Engine
- Every V-W Engine is Assembled by hand
- 4 Wheel Independent Suspension
